

VWO Product Requirements Document

Overview

VWO is a CRO and experimentation platform for digital teams. The platform helps teams create, manage, and launch experiments.

Goals

- Make experimentation easy for marketers and product teams.
- Improve experiment setup speed and shipping confidence.
- Provide trustworthy reporting and reliable personalization.

Key capabilities

- Visual editor for web experiments.
- Server-side experimentation for controlled rollouts.
- Audience targeting and segmentation.
- Analytics dashboards for win-rate and conversion insights.

Success metrics

- Reduce time to launch an experiment by 40 percent.
- Increase adoption across product and marketing teams.
- Improve retention for experiment owners through guided workflows.
